

# Collaboration & Consultancy Services

Creating new experiences on the front-line of innovation

At Tekle Holographics we believe that software is ever evolving. Using our Collaboration & Consultancy services together we can create new Holographic experiences pushing the boundaries of what is possible.

Our Holographic Devices come with a wide range of software capabilities. In the case that you require an application specific to your needs or want to integrate a new data format we can assist you with the development of such software.

Tekle Holographics offers services for both the consultancy regarding new software developments as well as execution of these software developments in a collaborative manner. All while working flexibly with your specific project needs and requirements.

With our vast knowledge of Holographics as well as state-of-the-art real-time 3D knowledge we can assist you through the full development cycle of your application, from concept and prototyping to deployment and maintenance. We ensure seamless integration, optimal performance, and a user-friendly experience tailored to your needs.

# Collaboration & Consultancy Services

## **Global Experience and Expertise**

Tekle Holographics has successfully provided consultancy and holographic software development services to numerous blue-chip multinationals across four continents. Our extensive experience working with global enterprises allows us to seamlessly adapt to local customs, regulatory frameworks, and work methodologies. Whether in North America, Europe, Asia, or the Middle East, our ability to integrate holographic solutions into diverse business environments ensures smooth implementation and high-impact results.

Whether you need strategic insights, software solutions, or technical collaboration, we provide flexible services tailored to your needs, ensuring smooth adoption and optimization of Holographic solutions.

## **Consultancy Services**

Our consultancy services help assess and optimize Holographic integration. We analyse existing workflows, define long-term strategies, and ensure your software requirements align with your objectives. Our UI/UX design consultation enhances usability, while data format and workflow optimization improve efficiency. For unique challenges, we offer tailored consultancy solutions to address specific business needs.

## **Collaborative Development**

We actively co-develop and implement Holographic applications, from initial Proof of Concept validation to full-scale deployment. Whether creating client-owned applications, collaborating on new solutions, or integrating our experts into your team, we ensure a streamlined development process. Additionally, we extend our SDK and API to meet specific project requirements, providing long-term support and flexibility.

## **Why Choose Tekle Holographics?**

With extensive expertise in real-time 3D technology and Holographic solutions, we deliver innovative, scalable, and user-friendly applications. Our flexible and collaborative approach ensures seamless integration into your existing workflows, supporting your long-term vision with cutting-edge technology.

# Collaboration & Consultancy Services

aa

<b>Consultancy Services</b>	
Process Assessment for Holographic Integration	We will assess your current processes and determine how and where Holographics can help improve your efficiency or solve any challenges.
Holographic Strategy & Roadmap Development	We work with you to define a long-term strategy for integrating Holographic technology into your business, ensuring alignment with your goals and industry trends.
Custom Software Requirements Analysis	Our team will assess your specific software needs for Holographic applications, defining technical requirements to ensure seamless development and integration.
Holographic UI/UX Design Consultation	We provide expertise in designing intuitive, immersive, and efficient user interfaces for Holographic applications, optimizing usability and engagement.
Data Format & Workflow Optimization	We analyze your current data formats and workflows, recommending and implementing improvements to streamline integration with Holographic systems.
Custom Consultancy & Tailored Solutions	If your needs go beyond our listed services, we're open to discussing bespoke consultancy solutions. Whether it's a unique Holographic challenge or an innovative concept, we're ready to explore how we can support your vision.

<b>Collaborative Development</b>	
Proof of Concept (PoC) Development	We rapidly develop functional PoCs to validate Holographic solutions, ensuring feasibility before full-scale development.
Client-Owned Application Development	We build custom Holographic applications tailored to your needs, with full intellectual property rights retained by you.
Tekle Holographics Collaborative Development	We co-develop applications that become part of Tekle Holographics' software offerings, ensuring long-term support and integration.
Joint Development with Your Team	Our experts integrate into your development team, providing hands-on support and expertise to accelerate your Holographic projects.
Partner-Assisted Development	Through our trusted partners, we provide specialized engineers to assist in the development of your Holographic applications.
THSDK & API Extensions	We extend and enhance our existing SDKs or APIs in collaboration with you to fit your specific requirements.
